MATHS

MATHEMATICAL CONCEPTS THROUGH GRAPH

Activity: Frame 3 pairs of linear equations in two variables (i.e 6 equations) Such that in each pair you get intersecting lines. Plot the pairs of these equations on the same graph paper.

Do you get the point of intersection of any two lines on X-axis?

If yes, then what is the condition for consistency?

If No, then draw two lines such that their point of intersection is on X- axis.

What do you think of condition for consistency If two lines intersect on Y- axis?

Note: Solve Linear Equation Worksheet in your note book.
